Jaemin Choi

PhD in Computer Science
jaemin@acm.org
Updated August 19, 2022

TECHNICAL INTERESTS
Distributed Deep Learning, High Performance Computing, GPGPU, Performance Modeling, Asynchronous Task-based Runtime Systems

EDUCATION

Doctor of Philosophy (PhD), Computer Science
Univeristy of Illinois Urbana-Champaign - Urbana, Illinois, USA
Advisor: Prof. Laxmikant V. Kale
Aug 2016 - Aug 2022

Bachelor of Science (BS), Computer Science and Engineering
Seoul National University - Seoul, Republic of Korea
Advisor: Prof. Jaejin Lee
Mar 2010 - Feb 2016

TECHNICAL SKILLS

Programming Languages: C, C++, Python
Parallel/Distributed Programming: MPI, Charm++, CUDA, NVSHMEM, SYCL/DPC++, PyTorch
Containers: Docker, Singularity, HPC Container Maker
Tools: Git, GDB, NVProf, Nsight Systems, gprof
Job Schedulers: PBS, Slurm, IBM Spectrum LSF
HPC systems: OLCF Summit, ALCF Theta, LLNL Lassen, PSC Bridges-2, SDSC Expanse

EXPERIENCE

Senior Deep Learning Architect   Aug 2022 - Present
NVIDIA Corporation - Santa Clara, CA
- Understand, analyze, profile, and optimize deep learning training workloads on state-of-the-art hardware and software platforms.
- Guide development of future generations of deep learning processors and computing platforms.

Research Assistant   Aug 2016 - Aug 2022
Parallel Programming Laboratory, University of Illinois Urbana-Champaign
- Optimized performance for GPU-accelerated applications on modern heterogeneous HPC platforms by developing new features in the Charm++ parallel programming system, including asynchronous completion notification and GPU-aware communication.
- Developed CharminG, a GPU-resident parallel programming framework built on CUDA and NVSHMEM, with the goal of performing task scheduling and communication inside the GPU devices.
- Improved support for NVIDIA and Intel GPUs in the NAMD molecular dynamics simulation framework.

Graduate Technical Intern (Mentor: Gengbin Zheng, Manager: Craig Belusar)   May - Aug 2021
Intel Corporation - Austin, TX (Virtual)
- Developed support for Intel GPUs in OpenMPI using Intel oneAPI Level Zero and Libfabric/OFI.
- Validated point-to-point and collective MPI calls on Intel GPU clusters with OSU micro-benchmark suite.

Research Intern (Mentor: Prof. Abhinav Bhatele)   May - Aug 2019
Lawrence Livermore National Laboratory - Livermore, CA

- Created performance models using parallel discrete event simulation (PDES) and roofline model to analyze and predict the performance of GPU-accelerated proxy applications in the Exascale Computing Project (ECP), including SW4lite and MiniFE.

Technology Research Intern (Mentor: Rasmus Tamstorf) May - Aug 2018
Walt Disney Animation Studios - Burbank, CA
- Optimized memory usage in a parallel path tracing renderer via de-duplication of scene objects.

AWARDS & HONORS	*HPC Session Best Presentation Award* 15th CSL Student Conference (CSLSC '20), University of Illinois Urbana-Champaign	Feb 2020
	Graduated with Honors (Cum Laude) Seoul National University	Feb 2016
	National Science and Technology Scholarship Korea Scholarship Foundation	Mar 2010 - Feb 2016
ACTIVITIES	*Chair Positions* Annual Workshop on Charm++ and Its Applications	2018 - 2021
	Student Volunteer SC '17, Denver, Colorado	Nov 2017
	SNU Tomorrow's Edge Membership (STEM) Honor Society, College of Engineering, Seoul National University	Dec 2014 - Feb 2016
	Korean Augmentation to the United States Army (KATUSA) Military Service, KATUSA Training Academy/NCO Academy, Camp Jackson	Apr 2011 - Jan 2013
